RI TRANSPARENCY REPORT

2019

Infranode

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

INF 05.2

Describe your organisation's approach to incorporating ESG issues in infrastructure investment selection.

Infranode shall evaluate risks and value creation opportunities from ESG when considering investments. Such analysis shall be an integral part of its commercial, financial, managerial and other analysis. ESG principles are applied in the context of asset sectors in which the firm invests. This means that if a potential investment promises similar returns as a competing investment but has a relative sustainability advantages in economic, environmental or social aspects, Infranode will always choose the more sustainable investment over its peer.

The outcome of the ESG analysis shall be included in the Investment Memorandum used in the Investment Committee discussion and Fund Board decision. The tools Infranode employs in undertaking the pre-investment ESG analysis are:

Exclusion: Infranode investment guidelines include a number of excluded areas and sectors that are in line with its long-term strategy of investing in essential infrastructure. Among these, a number of exclusion relate to its ESG policy. For example, it is Infranode's policy not to invest in companies directly involved in the extraction of fossil fuels, oil, coal and gas or investments where a material percentage of the revenues stem from fossil fuel related activities. When we do invest in industries in various ways related to fossil dependency but not in its direct extraction, we always develop the asset to take measures to manage their ESG risks in order to prevent or minimize a potential adverse impact from their business activities through our due diligence and ownership processes as described below. Other examples of excluded sectors are investments in arms, tobacco, pornography and alcohol, sectors involving harmful or exploitative forms of forced labour /harmful child labour, any operation or project engaged in the destruction of Critical Habitats etc.

Due Diligence: An ESG due diligence framework is employed on any investment that is considered. The framework includes potential ESG issues as those listed above, and tries to identify, weigh and discuss to what extent the target investment is mitigating the ESG risks or capitalising on existing ESG opportunities. Both quantitative and qualitative methods are utilised and are typically most effective when combined. For example, analysing water use and costs within a potential asset is a quantitative exercise, whereas making a decision upon water related policy going forward inevitably involves an aspect of qualitative judgement. The Due Diligence results in a qualified judgment by the analyst, to be incorporated into the Investment Memorandum forwarded to the Investment Committee and Fund Board for their discretion.

INF 11.3 Describe how your organisation, and/or operators, considers ESG issues in post-investment activities related to your infrastructure investments. [Optional]

Our ESG framework helps us identify specific aspects of materiality that we will monitor, control and engage on during the holding period.

When the identification has been done, we engage with the asset/company management to set up the necessary policies and processes to enable data collection on the identified aspects.

The ongoing data collection provide the basis for analysing the identified aspects so that we can better understand which areas to focus on.

Data from previous years serves as a basis for comparison and is presented as key KPIs to our investors.
